EXPLORE UNDER WATER

Discover Scuba Program Ages 18+ (Ages 10-17 with parental consent)

What is Discover Scuba?

This program is designed to give participants quick training on the bare essentials of scuba diving. This is a chance to give it a shot in a very controlled environment under the watchful eye of a trained professional. Familiarization with the equipment, basic safety skills, practice in the shallow, & easily controlled environment (like a pool) are the main components of a Discover Scuba class. In general, if you love snorkeling, we can almost **guarantee that you'll flip for scuba**. You do not need to have excellent form as a swimmer, the most important criteria is that you're comfortable in the water.
